### **Substance Abuse Policy**

#### **Scope of Policy**

This policy applies to students, teachers, parents and users of the school building. It applies during school time (including break times) and to all school related activities. It also applies to all other events/occasions when the School is in use.

#### **Introductory Statement and Rationale**

The decision was taken by the Teaching Staff of Gaelscoil Thaobh na Coille to draw up a substance use policy after considering the following:-

- In-service in SPHE in 2002 and the importance of this policy in the context of SPHE.
- The National Drugs Strategy, 'Building on Experience', is now Government Policy and it requires schools to have a drugs policy in place (Action 43).
- The report from the National Advisory Committee on Drugs entitled 'Drug Use Prevention' underlines the importance of schools developing drugs policies.
- To develop a shared understanding of the term 'drugs' and to define the
- Schools' agreed position in relation to drug related issues.
- To equip schools to deal with issues relating to substance misuse in a planned and considered way and in accordance with their statutory responsibilities.
- To assist teachers in their classroom experience.

#### **Aims of Policy Implementation:**

- To ensure the welfare, care and protection of every young person as provided for in the Education Act, 1998 and the Education (Welfare) Act, 2000.
- To ensure that the school complies with legislative requirements and principles of good practice.
- To make a contribution, in the area of education and prevention through the SPHE programme.
- To minimize the dangers caused to children by drug misuse and drug users within schools/communities.
- To manage drug related incidents in a planned manner.
- To support parents and pupils in addressing drug misuse.

### **School Philosophy**

In Gaelscoil Thoabh na Coille we strive to create a *positive learning environment* in which due regard is paid to the intellectual, physical, social, emotional and spiritual development of the child. Where the *Irish language* is central not only to the learning process, as the language of instruction but also as the language of communication amongst teachers, children, management and parents/guardians (where possible). Special emphasis being placed on all aspects of *Irish Culture* thus encouraging pupils to partake in cultural activities both inside and outside of schools. To instill in the pupils a *positive attitude* towards learning thus enabling them to learn independently. *Creating an atmosphere* in the school that encourages the pupils to be independent, tolerant, kind, confident and co-operative. Teaching the *Catholic religion* and using it a source of moral guidance in the school. *Parents are seen as partners* in the mutual education of their children and are encouraged to become involved in the development of the school through the Parent's Association and the Board of Management. Each and everyone involved with the school (pupils, teachers, parents) shall be *treated equally* in every aspect of school life.

### **School Vision**

The school sees itself as having a role in the process of enabling students to increase control over and improve their health. We endeavour to promote the well being of students by:

- Providing a safe secure healthy environment.
- Promoting positive health behaviours.
- Increasing knowledge about health.
- Developing self-confidence and self esteem in the pupils.
- Developing good interpersonal skills.
- Developing good listening skills, enabling the pupils to listen attentively and with consideration.
- Paying due regard to the development of each area of the curriculum: the languages, Irish and English; Mathematics; Social, Environmental and Scientific Education; Art Education; Physical Education; Social, Personal and Health Education; and Religious Education
- Demanding a high standard of behaviour. Ensuring that pupils are kind, considerate and well mannered at all times to other pupils, teachers and visitors, so that there will be a positive atmosphere of co-operation in the school. (see code of behaviour)
- Ensuring that the pupils attain the highest standard according to their ability.
- Creating an environment in which the pupils can express themselves through different media – for example music, art, sport, dance, drama etc.

**Definition of a Drug:** A drug can be defined as a chemical which causes changes in the way the human body functions mentally, physically or emotionally. For the purpose of this policy we are concerned with drugs which have the power to change a previous mood and the way a person thinks about things and drugs of which the taker may become physically or more often psychologically dependent.

**Current Provision:** Provision is currently made in the school for alcohol, tobacco and drug education through SPHE (Social Personal & Health Education). Specific Programmes include:

- The 'Walk Tall' programme
- The 'Alive-O' programme
- The 'Be Safe' programme
- Relationship and Sexuality Education
- Talks and support from local Gardaí

### **Aims of Policy**

The child should be enabled to:

- be self-confident and have a positive sense of self-esteem.
- develop a sense of personal responsibility.
- develop an understanding of healthy living, an ability to implement healthy behaviour and a willingness to participate in activities that promote and sustain health.
- develop a sense of safety and an ability to protect himself/herself from danger and abuse.
- make decisions, solve problems and take appropriate actions in various personal, social and health contexts.
- become aware of, and discerning about, the various influences on choices and decisions.

**Implementation of the Policy:** The policy will be available to the Board of Management, Parents, Teachers and other staff members. A hard copy may be requested from the school secretary or it may be read or downloaded from the school's website [www.taobhnacoille.ie](http://www.taobhnacoille.ie) – in the school policies section.

Enrolment in the school is dependent on acceptance by the parents of this and other school policy documents. The school wishes to make clear that the primary role of substance misuse prevention rests with the parents.

**Education on substance use:** It is accepted amongst educationalists that education about alcohol, tobacco and drugs is best carried out by teachers through the inclusion of SPHE in the curriculum. In Gaelscoil Thaobh na Coille education about alcohol, tobacco and drugs will be provided in the broader context of a Social, Personal and Health Education Programme which is delivered in the context of a supportive whole school environment. This SPHE programme will from time to time draw on the expertise available from the

community i.e. parents, Health Board and Gardaí. The use of an outside visitor/speaker to enhance the work done in class will always be considered in the context of the SPHE programme and will always be undertaken in the presence of the teacher.

#### **Implementation Programme**

The policy will involve consideration of some or all of the following through the ‘Walk Tall’ Programme.

- Development of a school climate and culture which values and practises respect in interpersonal relationships.
- Helping children to appreciate their worth and the worth of others.
- Helping children to take responsibilities for themselves and others.
- Paving outlets for creativity and enjoyable pursuits and activities.
- A structured programme of SPHE which has substance misuse prevention as an integral part.
- Support for vulnerable children.
- Strengthening the co-operation between school, parents and the wider community in dealing with substance misuse prevention.

Self-esteem is a core theme of the “Walk Tall” Programme and all the class programmes aim to develop the Child’s self-esteem. The child with good self-esteem is better able to resist opportunities or offers to misuse drugs, make good choices about personal safety and sustain healthy relationships.

The “Walk Tall Programme” substance use issues commence specifically at second class level.

## Roles and Responsibilities

The policy was formulated to support the need for a policy in relation to substance use in line with the overall ethos of the school. This policy was developed in consultation with the representative of the Board of Management, parents and teachers. It will also be implemented and evaluated by these parties.

It should be read with the Code of Behaviour/Discipline policy of Gaelscoil Thoabh na Coille – An Cód Iompair/Rialacha na scoile.

This policy will be available to teachers, parents, Board of Management, ancillary staff and any other person or group who hire the school. It will also be published on the schools' website [www.taobhnacoille.ie](http://www.taobhnacoille.ie).

We would like to state clearly at this point that parents have the primary responsibility when it comes to the prevention of misuse of substances but the school will support them by implementing the programmes and strategies mention above.
